Hands-On-Activity No. 2

Data types and Pseudocode

Course Code:	**Program:**
Course Title:	**Date Performed:**
Section:	**Date Submitted:**
Name:	**Instructor**

1. Objective(s)

This activity aims to develop the skills of students in creating pseudo-code instructions for a program.

2. Intended Learning Outcomes

2.1 Understand Data Types

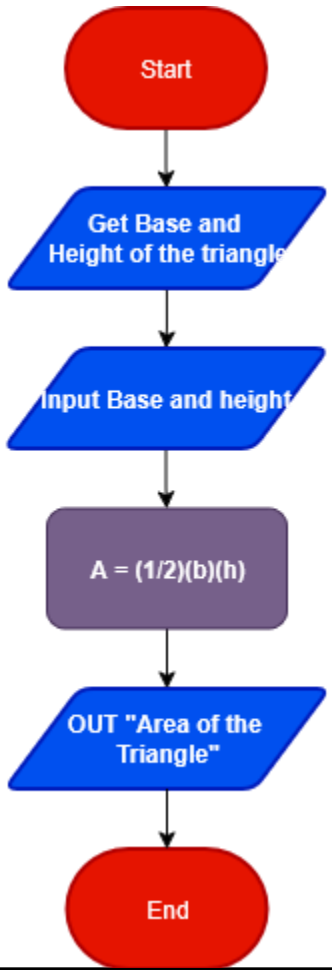

2.2 Develop Pseudo-code Instructions of a program

3. Materials and Equipment

Internet connection
Personal Computer

4. Procedure

5. Output

Pseudocode:

```
START
    PRINT “PRODUCT - (b)(h)”
      INPUT b_=_b
      INPUT h_=_h
      PRODUCT = b
                h
      INPUT b_and_h on Area of Triangle=(1/2)(b)(h)
      COMPUTE Area of Triangle=(1/2)(b)(h)
      OUTPUT = Area of Triangle
    PRINT “Area of Triangle”
END
```

6. Conclusion
Learned datatypes on lecture and again applied flowchart
7. Rubric
